

## **Project Update: July 2007**

JED celebrated 5th anniversary on June 5th 2007. On the day, we also celebrated the environment day. JED and Wisnu Foundation invited communities in JED villages and the people around the office area to come and involve in planting some trees in the office area. We are expecting awareness from the people to environment surround them, besides we will use plantation to support the program in foundation and to support the ceremony that we held during the year.

Based on our internal record, JED had handled some visitors to visit our four villages and start increasing. All of them gave great appreciation since they already deserve a proper service. The villagers already got F & B, first aid and ECO Guide training before handling the visitors.

In regards with the multipurpose plantation that we are going to plant in the villages, please kindly noted that the details data of the identified plantation will be reported on our next report by attaching the list of the plantation which are good for the soil and could be used to support ceremony.
