

**Project Update: June 2010**

We met a youth group in Bhorgiri village (periphery of the sanctuary) who are interested in taking the programme to their village school. We will be training a couple of members of the group, who will in turn conduct the workshops in the school. We have agreed to assist them for a few initial sessions in the school. The grades to be addressed from this school range from 1 to 7. Hence we will have to rework the content for the younger children.

In Tokawade School, where we have interacted for 2 years, the principal has now agreed to let interested teachers get training once a month, so that they will continue with the programme once we stop our intervention.

We are starting both these activities on 24th June 2010.
