

Project Update: October 2008

On 6 October 2008. we have a group of 25 students participated from the following local schools:

- Phoo Kao Thong school
- Baan Kamphuan school
- Dome Thong school
- Damrangsart school

This group has done the following activities:

- Mr.Phanuwachr, KCLC's Director explained the RSG project to them.
- Observed the seeds of Mangrove species that the UCLA students, Birmingham University students and women and fisher-folk group planted in July, August and September 2008 respectively.
- They all prepared the soil bags.
- Searched for the seeds of new Mangrove species, they could find 7 more new species.
- Finally, we are able to collect totally 20 mangrove species.

The following are all the 20 species (seeds) we found:

1. *Aegialitis rotundifolia*
2. *Avicenia alba*
3. *Avicenia officinalis*
4. *Bruguiera cylindrica*
5. *Bruguiera gymnorrhiza*
6. *Bruguiera parviflora*
7. *Cerbera odollam*
8. *Ceriops decandra*
9. *Xylocarpus granatum*
10. *Ceriops tagal*
11. *Heritiera littoralis*
12. *Lumnitzera littorea*
13. *Nypa fruticans*
14. *Ryzophora apiculata*
15. *Ryzophora mucronata*
16. *Pandanus odoratissimus*
17. *Terminlia catappa*
18. *Caesalpinia crista*
19. *Sonneratia caseolaris*
20. *Dolichandrone spathacea*

On October 8, 2008 the teachers of Uttao kindergarten school brought the small kids (age 3-4 years old) group of 20 to study in our Living Laboratory.

October 16-31, 2008, we have built up a small nursery area in our Kamphuan Community Learning Center as calling "The Mangrove Terrace". This unit we used for explaining the visitors to understand briefly what RSG project is before we bring them to our living laboratory site at Prapat beach.
