

Project Update: August 2013

My organisation and I continue to give conservation education, follow-up field extension training in beekeeping and support to project beneficiaries (Amassi, Bantakpa, Ekaw and Ngwo villages). Please find a few pictures of my field activities for July and August 2013. I am also happy to inform you that some of the beekeepers have carried out the very first harvest of honey from their beekeeping activities and already sold the honey in the local markets. I hope you appreciate them.
