

Project Update: January 2014

Activities

1. Community Lectures on ICS: Lectures included ICS information, benefits of ICS on human health, environment, and gender issues. Awareness materials were distributed in awareness campaign.
2. Questionnaire survey to identify stakeholders willing to install ICS: Criteria was set for installation of ICS which includes marginalised communities living near to buffer zone community forest and those who belong to pro-poor communities.
3. ICS installation and field demonstration of ICS models, materials by trained person.
