

**Project Update: November 2012**

**14<sup>th</sup> November 2012**

Presentation of the proposed project with the Director of the Park followed by identification of the villages where we will work. This is with the MNP guide. These villages are directly and indirectly dependent of the park. During this activity, we showed photos of the species to people and asked them in what manner, in general, they use park resources.

**15<sup>th</sup> – 16<sup>th</sup> November 2012**

Identification of the inventory sites. With some established sites by researchers (Franco Andreone's sites), we identified three new potential sites in the north east with the MNP guide which are in 30 km of the Park. We saw a bush fire in the North Eastern of the park.

Left: *Mantella expectata* in the water. Right: *Soazara* with *Scaphiophrynus*.
