

Project Update: January 2013

An awareness programme about the in situ and ex situ program of *D. hatagirea* was conducted on the upper ghasa of Lete Village Development Committee of Mustang District with collaboration of staff of Annapurna Conservation Area Project (ACAP). The programme was conducted in ACAP check post office where the participants from the ACAP itself, Womens' group, Local Youth Clubs, Conservation Area Management Committee (CAMC) and local people actively participated in the program. There were 30 participants in the programme. A video presentation was done at the end of program. Leaflets about the *Dactylorhiza hatagirea* were distributed to the participants. The programme proved to be effective among the local people.

Awareness programme at ghasa checkpost in Lete VDC
