

Project Update: November 2012

Government institutions are also one of the major stakeholders for creating awareness and forming policies about the conservation program. The talk programme on the in-situ and ex-situ conservation awareness of *Dactylorhiza hatagirea* was held in seminar hall of the Nepal Foresters' Association, Kathmandu. The three conservation organisations of the Institute of Forestry, Pokhara Campus, Pokhara i.e. Alumni Association for Conservation and Development (AACD), Himalayan Scholars' Group for Conservation (HSGC) and Union for Nature Conservation (UNC) along with Nepal Foresters' Association(NFA) which a government institution were involved in organising the talk programme on in-situ and ex-situ conservation of *D. hatagirea*.

The programme proved to be really beneficial to the members of NFA, government officials from different departments and other participants.
