

Project Update: March 2013

In March, developed the first field and conducted the following activities:

1. Reconnaissance visit - New points were selected and standardised sampling protocols for the reptile search were established.
2. Sampling - Sampling was carried out day and night in the woods and surrounding areas.
3. Socialisation - Socialisation sessions were held with the communities; we explained what the project would achieve and it was accepted by them for us to perform the work with school children.
4. Socio-Economic. An initial inspection of the socio-economic component of the people, necessary for the final phase of the project, which will be stipulated in the action plans.

Activities for the month of April and mid-May:

1. Field trips.
2. Start working with school children.
