

## **Project Update: April 2016**

We have two exciting announcements!

1) Today, we were featured in the news by National Geographic. You can read the story here: <http://news.nationalgeographic.com/2016/04/160407-frog-rescue-chytrid-fungus-honduras-cusuco-jonathan-kolby/>

2) We just released a new video and launched a crowdfunding campaign to help support the final stage of construction of our frog rescue facility. You can view it here: <https://www.indiegogo.com/projects/save-frogs-from-extinction/x/13699548#/story>

Thank you in advance if you're able to help support our work! We've already invested several years into the foundation of this wildlife rescue project and now we're so close to becoming fully operational! With your donations, we'll be able to remain on schedule and open next summer.
