

## Project Update: December 2014

In order to enlarge the herbarium database collections of Turkish Orchids, we visited RBGE Herbarium from 9<sup>th</sup>-29<sup>th</sup> November 2014. 1224 herbarium sheets were photographed in total. It means we have at least 1224 more data points for the database. Most of collections belong to Gerd Taubenheim and are from the 1970s. Right now, we are entering the data gathered from RBGE to excel spreadsheet.

All detailed statistical data will be published on manuscripts and partly in final report soon.
