

Project Update: March 2015

1. Two abstracts that will be presented in the international mangrove workshop to be held in Cali, Colombia this month. (Also attached separately.)

[II SEMINARIO-TALLER INTERNACIONAL DE ESTUARIOS Y MANGLARES](#)

2. Two pictures including one taken with a drone of the principal shrimp fishing ground during our last visit (February 28th – March 4th 2015) to our study area in Colombia (Iscuande). During this time the ban on shrimp harvesting ended and we were documenting the artisanal fisheries dynamics during this season.

3. This is the logo of our outreach material which will be produced within the next two weeks in form of t-shirts that will be distributed at our study sites and other partners.
