

Project Update: October 2014

In September 2014, the Tsam Tsam team began visiting sites of potential partner destinations. We took our motorboat down the Ogooué River with a visiting international tour operator on a scouting to trip to identify potential partners and destinations in the Fernan Vaz Lagoon that could be reached by boat and then by road into Loango National Park. In October 2014, the Tsam Tsam team travelled by road to Moukalaba-Doudou National Park to complete the first half of an exchange with our partner organisation PROGRAM. Tsam Tsam guides experienced being tourists and gave feedback to PROGRAM guides at two sites in the park. In one month, the PROGRAM team will reciprocate with a trip to Tsam Tsam in the lake region of Lambaréné.

Tsam and PROGRAM guides exchange experiences and knowledge in Moukalaba-Doudou National Park on the first half a site exchange.
