

## Project Update: November 2015

Green Care Association (GCA) has been working with four communities within Bui Division since July 2015 with introducing the project at the level of palaces and community dwellers of Nseh, Mbokam, Kovifem and Kishoor. In all of these places, the traditional leaders (Fons) of the concern communities were very happy and thankful to GCA staff for thinking and coming to assist their communities. GCA took the opportunity to inform the inhabitants further about what the project shall be all about and the role that the communities will play in the project.

This was followed by launch of tree planting at Ndurum forest in Nseh, and at the Kovifem Forest. A total of 220 trees were planted in each of these forests.

GCA also trained two tree nursery attendants from each of the communities of Nseh, Mbokam, and Kishoor and equipped them with tree seeds, watering cans, and other tools like cutlasses and spades.
