

### **Project Update: November 2014**

To get the views of the community living around each cave, questionnaires were given to 10 members around each cave. The respondents selected were a minimum of 14 years old and gender balance was also considered. To deal with language barrier, an interpreter/translator assisted in administering the questionnaire.

The questionnaire had the following information and questions: date, nearest bat cave, nearest town/village, respondent name, age, phone number, knowledge, beliefs, benefits, conflicts from bats and view on bat conservation.
