

Project Update: October 2015

Logo

Camp implementation in late June.

Hatchery construction with fishermen helping us.

1° volunteers training.

1° Translocation to the hatchery- training

Placement of PIT tags in breeding females at night.

Just a few numbers so far:

- 21 nests in the hatchery;
- More than 500 nests in the wild;
- 11 international volunteers and 10 national;
- 7 lost females that were saved;
- 32 Females with Pit tags and DNA and biometric data collection;
- One hurricane (FRED, the first one in the Cabo Verde History).

1° New-borns from natural nests.
