

### **Project Update: August 2016**

This is a very important aspect of our work, teaching the kids that protecting sea turtles is much more valuable than illegal harvest.

Dominic talks about the biology of the turtles and then teaches the kids to use the radio with GPS, the calipers, the digital scales for some hands on learning. He interacts with these kids very well and by doing this builds a better future for our turtles, and the people who live with the turtles.
