

Project Update: January 2016

It has been follow as the calendar programme with an advance of the 50% of trips made. For the coast of the Departamento de La Libertad has been sightseeing bottle nose dolphins (*Turiops truncatus*), pantropical spotted dolphins (*Stenella attenuata*), however no whales for the present moment. The interaction with the fishermen has been of indifference to the task performed. A very important result is that the size of the sighted groups are less than 10 individuals.
