

Project Update: October 2016

During October 2016, we implemented a series of activities on the project:

- Setting up information table in the area of the National Park Prokletije, Skadar Lake and Biogradska gora, as well as in the area of Park Forest Gorica. Setting up an informative table was done in National Park Prokletije, National Park Skadar Lake, and the NGO association for nature lovers. These information tables are the first on endangered mosses in Montenegro.
- We set up the first ex situ conservation of mosses in Montenegro. Set the boxes in which they are living moss species, which will continue its life cycle in a botanical garden in Kolašin.
- Completed to educate the local population about mosses, their protection and the importance of this project.
