

## Project Update: January 2017

During October and November 2016, we held lectures for students of elementary schools and faculties.

First lecture was held in elementary school of the study area - „Jovan Jovanović Zmaj“ in Kovin for students and their teachers about the importance of frogs for ecosystems and their threatening factors. An article about our presentation was published on the school website (<http://www.zmajkovin.edu.rs/index.php/aktuelno-dogadjaji/769-naucnici-u-nasoj-skoli>) and in online newspaper (<http://kulturanadar.dar.org.rs/fotografije/naucnici-i-deca-kovin/>).

Second lecture was held at Faculty of Biology for biology students and members of society for research into the biology “Josif Pančić”. The posters were hang in the hallways and main auditorium announcing the subject and the time of lecture.
