

Project Update: November 2016

During the gap cover collection found *Astragalus ghortensis* (little population) as well as *Geranium swatense* (good population) from Gherat Gol.

Awareness further extended in already formed Endemic clubs of schools among Goleen, Brir, Laspur. Similarly Endemic group of Village Conservation Committees (VCCs) in these valleys were also further connected through meetings.

VCCs meeting at Laspur

Members of endemic club from Goleen

Convincing meeting with locals at Brir
