

### Project Update: August 2009

The progress of project was as follows:

1. To help the local farmers to check the growth of seahorse and holothurian in the seagrass beds.
2. To help the local farmers to culture the mollusc (*Strombus luhuanus* Lin.) in the rehabilitated area of seagrass meadows.

Left: Seahorse after 5 months of culturing in the rehabilitated area of seagrass beds. Right: The mollusc of *Strombus*.
