

Project Update: January 2010

1st January 2010,

The study tour group of 15 students from ERECON (Institute of Environment Rehabilitation and Conservation), Tokyo, Japan visited our mangrove terrace. They were very impressed with our Mangrove for Rehabilitation and Biodiversity-RSG-Project. ERECON is a non-profit international organization that aims to contribute to sustainable use of natural resources in Asian countries. Their works also related to the environment rehabilitation, conservation and illuminating campaign of environment.

13th January 2010,

A group of 50 students from the “Youth Muslim Save the Environment Club” (School Outreach Program) participated in RSG-project by visiting our nursery where we are in the process of preparation to construct the walkway soon. They learned about seedling production and were enjoyed planting the mangrove at the degraded area in Prapat beach.

January 20, 2010

Ruttima has selected the woods in the local store to use for building the walkway at our RSG nursery. We are now preparing the inside area of our nursery and will start to construct the walkway in early February 2010. It will be the first mini walkway in the nursery on the Andaman coast. The visitors will have an experience to learn about our RSG living laboratory.

January 30th, 2010

The group of 50 local community members, young fisherfolk, traders, and youth of Kamphuan village visited the KCLC Mangrove Terrace to learn about the RSG project. After getting an explanation they went to the degraded area in Prapat beach to attend the special event. Firstly, they were all hand in hand in a circle and peacefully sent their hearty support to the people of Haiti. Furthermore, as we know some famous scientists predicted that there will be tsunami in this region again in the mid- 2010. Therefore, all of us prayed to God and our mother nature kindly save us and our loved ones and help us get away from whatever tsunami will happen or not before they replanted the mangrove with joyfulness.
