

Project Update: December 2009

Please find an online recent publication / a touristic route webpage related to our project <http://www.turism.md/eng/topheritage/71/> (in English, Romanian and Russian) done in cooperation with the Ministry of Tourism of Moldova.

We are glad that there is a sustainable impact of our project after the termination of the project activities *per se* - there is an interest of regional community to visit our place and to contribute to regional tourism and nature conservation. We have been contacted by various stakeholders in Poland and Romania to offer services on regional eco-rural-tourism and nature conservation. Local community (local/village authority, town district authority) will be engaged/employed in such activities as offering accommodation, meal, guidance for visitors from abroad and from in-country public.
