

Project Update: June 2010

Here is the last report on our Javan gibbon conservation activities in Central Java . The map of distribution of Javan gibbon in Dieng Mountain, Central Java is shown below.

The recent field work in the Sokokembang communities have successfully establishing a biogas plant using cattle dung in a family house of Sokokembang village. We have trained five villagers on how to make this alternative energy. See photos in this link: <http://picasaweb.google.com/wawan5361/JavanGibbonConservationActivities?feat=directlink>

We have presented our field work at Student Conference Conservation Science in Bangalore , India, 16-19 June 2010. We brought a poster for presentation contains our field work included previous survey in Mt. Slamet, the poster can be downloaded in this link: (http://www.4shared.com/document/vmde2MC/javan_gibbon_poster_at_SCCS_ba.html)
