

'Lost...or waiting to be found'

A race to conserve the endemic and globally threatened frog in Mt. Elgon (*Arthroleptides dutoiti*)

Mt. Elgon, the home of the Torrent Frog

Arthroleptides dutoiti at the Museum of Cooperative Zoology, Harvard University

Arthroleptides dutoiti specimen last collected in 1962 at Suam River in present day Bukwo district. NatureUganda with financial support from the Rufford Foundation and in partnership with Uganda Wildlife Authority is conducting research to determine the conservation status of the frog.
