

## Project Update: January 2017

### 1. Livestock Vaccination campaigns

Under the Project *“Community Based Human-Carnivores Conflict Mitigation in Gehrate Gol Community Game Reserve Chitral, Pakistan II* livestock vaccination campaigns were conducted in six villages of Gehrate Gol and surrounding areas. With the help of village vaccinators about 6782 livestock have been vaccinated against foot and mouth, pestide petites ruminant, contagious caprine pleru pneumonia, goat pox, sheep pox and Entero toxemia. Herder families of the area were very happy with the vaccination of their livestock and this will change the attitudes towards carnivore’s conservation more and more positive. Herder families in Gehrate Gol and vicinity areas lose up to five times more livestock to diseases than to predation.
