

Project Update: November 2017

During October 2017 we decided made an extra field trip using to Quetzalito community and Livingston.

The activities were very successful. We went to Quetzalito a fishermen community near to Livingston, where we delivered 100 colouring books about sharks and rays. We also walked 1 km to this community because of the bad weather (flood) and there was no electricity but people were very grateful for this visit and for the colouring book for the children.

In Livingston community we delivered 25 books to the fishermen children and also we decided to give to Cuerpos de Conservación de Omoa, Honduras 50 colouring books, these books will be used in 2018 in Cuyamel, Honduras.
