

Project Update: July 2006

This July, students were given socialization of wildlife biodiversity. Facilitator gave this subject by storytelling with flipchart media. After storytelling, students asked to joint with the game activities that related to what already described on the story telling. The game was students have to guess what animal represented by their friends who showed the behavior and sound of the animals.

On the weekend, students asked to follow herpet observation on the evening and birdwatching on the next morning. For this activities they have to stay overnight at schools. These activities lead them to more aware to their surroundings.

This month subject for the teacher was about biodiversity surrounding school complex as teaching media. This subject represented by Mr. Mulyadi, as environmental education practitioner. Expectation result of this teacher meeting were to aware teacher of the potency of environment surround them that can be use as teaching media.
