

Project Update: February 2017

Activities and timescale

Publication of a Catalogue on Bats of Ghana.

An introduction on Ghana highlighting topics such as zoogeography, climate, history and vegetation will be drafted for possible publication in a scientific journal, e.g. *European Journal of Taxonomy*, by April 2017.

There was an error in the date, where I committed to publishing the catalogue of bats of Ghana as well as an introductory piece on bats of Ghana to the European journal of taxonomy by April 2017, the date was supposed to be April 2018. I do hope this can be changed in the proposal, humble apologies for the error.
