

Project Update: April 2018

As the project is coming to the end in a few months we made promotional material. We decided that should be a bear silhouette with the Rufford logo. For the money that we had predicted, we had 20 t-shirts printed and 10 posters (B2 format). All members of our team got t-shirts, also a few celebrities who supported our project from the beginning. Posters are set on Faculty of Biology, University of Belgrade, and local partner NGO "Udruzenje gradjanja Jadovnik" from Prijepolje. In the next few days we are going to make a small quiz on Facebook page "Udruzenje gradjanja Jadovnik" (<https://www.facebook.com/jadovnik/>), where we will present five t-shirts to people who answer correct on our question about bear Miloš.

Here are a few photos to see how our promotional material looks like.
