

## **Project Update: February 2008**

I created and founded a section 21 company called "Ocean Messengers" and the first thing we did was the publication of a film which should open some eyes and make understand that income, profit and tourism goes hand in hand with sea creatures.

The film has achieved international interest and won several prizes (you may see the film in a downgraded version at YouTube divided in part 1 and 2):

<http://www.youtube.com/watch?v=V3rWd2VeuY>

<http://www.youtube.com/watch?v=kbpeBp2Amiw>

The message Ocean messengers is carrying out into the world is a desperate cry for help to protect the environment, not only certain species but complete coastlines and bays. No other way we can protect what we love!

I, Rainer, consolidator of Ocean Messengers, will do anything to carry out this message - worldwide - to put international pressure on SA.

If you like my concept, you can read more at: [www.ocean-messengers.com](http://www.ocean-messengers.com)
