

Project Update: February 2020

It's my pleasure to share with you our paper (Three new records of Orchids from Nepal) published in a recent issue of JJB. This work is part of my research project in Panchase, Central Nepal which was funded by the 'The Rufford Foundation' -'Ref. 22182-1'.

Paper Title: Three New Records of Orchids from Nepal

Abstract: Three orchid species, *Ania penangiana* (Hook. f.) Summerh., *Neottia longicaulis* (King & Pantl.) Szlach., and *Odontochilus elwesii* C. B. Clarke ex Hook. f. (Orchidaceae) are newly reported from Nepal. Diagnostic characters, distribution notes, and a photograph are provided for each taxon.

Acknowledgement: This research was financially supported by The Rufford Foundation (Ref. 22182-1). Mr. Chandra Kanta Subedi (RECAST, TU) is kindly acknowledged for his technical support. Authors are thankful to Prof. Leonid V. Averyanov, Dr. Phillip Cribb and Dr. Naresh Swami for confirming the identity of the species.

Neottia longicaulis
