

## Project Update: May 2018

### Introduction

In our project titled "*Promoting the conservation of Red Colobus in Itwara and Matiri Forests, Uganda through population monitoring, awareness creation and beekeeping*" I shared findings with during a community engagement workshop organised by the Queen Elizabeth Parks Project 'Connecting People and Wildlife'. We plan to conduct environmental awareness in the community.

### Actual achievements during this period

- Shared findings to protected area managers in the zone following an invitation by the Queen Elizabeth National Park Projects for their workshop on 27<sup>th</sup> February 2018.
- Prepared presentation for IPS Nairobi 2018.

### Next steps

- Conduct community awareness based on the findings and promote environmentally friendly income generating activities.
- Write the project report.
