

## Project Update: August 2018

From April to July 2018, the team continued with the community sensitisation and education activities. As well as the formation of Community Fire Management Advisory Group (CFMAG), Environmental Management Clubs (EMC) and capacity building workshop.

More than 500 community members have been reached successfully, through one-on-one, talk shows on local radios, community gatherings and floating. During the process, 100 dedicated members were selected as CFMAG and EMC members. The team has formed strong CFMAG and EMC, which comprise of students (from primary to senior high school), community members and opinion leaders (including teachers, sub-chiefs and assembly members). Their capacities have been built to continue with the spread of conservation messages; simplified handout have been provided to guide their education activities in schools and in communities as well as fire management. Moreover, the teachers have been urged to include them in the environmental studies course.
