

Project Update: April 2018

I would like to share what we distributed through our activities about poaching and environmental awareness. So, we:

1. Distributed more 6000 flyers and poster as I attached for you inside these three towns (Kalar, Kifri, and Khanaqeen) especially the main checkpoints for exit and entrance of each of them, second inside Kalar Technical Institute and Garmain University. Also, some of these flyers we distributed 16-04-2018 which is environmental day in Kurdistan region Iraq.
2. Workshop including seminars and presentation.
3. Species distribution modelling and conservation training courses.
4. Field work - our team visited more than 30 locations around these three towns which we spot the species in most of them, so I attached the map for those locations that we visit.

Locations of surveys.
