

## Project Update: April 2018

We established communication with the workers of the Santuario de Fauna y Flora Guanentá Alto Río Fonce to work together with the students of the Institución Educativa Agroindustrial Francisco Medrano (Educational Institution). Environmental education activities were carried out focused on amphibians and their ecosystems (Andean forests, páramos).

Photograph 1. Cultural hall of the school.

### 1. Organisation of the workplace

The work site was the cultural hall of the school; there we organised the work material, the chairs and the projector.

Photograph 2. Organization of work material.

## 2. Presentation

We carried out the presentation of the work team to the teachers and children of the school, we explained the objectives of the project and we projected several videos about the páramos and its importance, likewise a video about the amphibians.

Photograph 4. Socialization poster "Amphibians of Guanentá"

### 3. Development of social work with primary school children

The work consisted of evaluating the value that children give to biodiversity, games, drawings, questions and contests were held around frogs and páramo.

Photograph 5. Playful activities with the children of the primary school of the village El Carmen

Next activities: Field trips for amphibian sampling, habitat characterisation, social work with high school children

**Work Team:**

- Azarys Paternina
- Diego Felipe Higuera
- Johana Muñoz
- Gladys Cárdenas
- Olga Castaño.
