

Project Update: January 2019

Photo set 'A': *Encephalartos chimanimaniensis* 'pups' planted in sand just after applying rooting hormones

Photo set 'B': A set of paper potted *Encephalartos Chimanimaniensis* 'pups'

Photo set 'C': Chatting with an employee at the herbarium explaining watering and moisture levels needed by the plants as they continue the process of rooting.

Paper potted plants continuing the rooting process and some which are blooming!

Photo set 'D': Progress among the paper potted plants

Photo set 'E': showing some plants affected by a weevil and some by moisture levels higher than required

More photos of plants affected by a weevil
