

Project Update: March 2018

Last Monday I was in the nature park "Ponjavica" with colleagues from Novi Sad (Department of Biology and Ecology - Chair of Hydrobiology and Environmental Protection). I joined them during their field research because they write the Fisheries Management Program for the nature park "Ponjavica". On that occasion, I met with the nature keepers (who are also fish guards), with whom I will cooperate during our field research, as well as with the president of the Association of "Ponjavica" Nature Park Lovers (NGO).

Ponjavica

Left: Milica with colleagues from Novi Sad. Middle: Fish guards with Prof. Miljanovic. Right: Fish guard releases the measured fish.
