

# Evaluating the effectiveness of Long-Term Integrated Research and Conservation Education Program, Azerbaijan

By Yelena Gambarova

# NATIONAL STRATEGY of the Republic of Azerbaijan on Conservation and Sustainable Use of Biodiversity for 2017-2020

## Order

of the President of the Republic of Azerbaijan

on Approval of "National Strategy of the Republic of Azerbaijan on Conservation and Sustainable Use of Biodiversity for 2017-2020"

Following item 32 of Article 109 of the Constitution of the Republic of Azerbaijan, and according to Article 6 of UN Convention "On Biodiversity",  
I hereby decide:

1. To approve the "National Strategy of the Republic of Azerbaijan on Conservation and Sustainable Use of Biodiversity for 2017-2020" (attached).
2. To appoint the Ministry of Ecology and Natural Resources of the Republic of Azerbaijan as a coordinating authority for the implementation of the National Strategy approved by the 1<sup>st</sup> part of this Order.
3. The Ministry of Ecology and Natural Resources of the Republic of Azerbaijan should inform the President of the Republic of Azerbaijan on the activities performed for the implementation of the National Strategy not less than once per year.
4. The Cabinet of Ministers of the Republic matters arisen from this Order.

Ilham Aliyev  
President of the Republic of Azerbaijan  
Baku City, 3 October, 2016

## 6. Action Plan of the Republic of Azerbaijan on Conservation and Sustainable Use of Biodiversity

No.	Activities	Outcomes	Implementing organizations	Implementation period (per year)
1	2	3	4	5
<b>6.1. Ensuring broad extension of environmental education in the society for improving awareness of population on biological diversity and ecosystem services</b>				
6.1.1. By 2020 reflection of the issues related to biodiversity and ecosystem services at all levels of education, mobilization of the required resources and increasing the knowledge of the relevant staff.				
6.1.1.1.	Increasing number of issues related to environmental protection, biodiversity conservation and ecosystem services at different levels of education.	knowledge of the students on the protection of environment, conservation of biodiversity and ecosystem services will increase	MEdu, MENR	2017-2020
6.1.1.2.	Providing detailed information on biodiversity and environment in the textbooks	detailed information on biodiversity and environment will be provided in the textbooks	MEdu, MENR	2017-2020
6.1.1.3.	Supporting environmental education centers in order to increase knowledge and education of school children on ecology.	the efficiency of the environmental education centers will increase	MEdu, MENR	2017-2020
6.1.1.4.	Establishing of information, resources and training centers on conservation of biodiversity and strengthening technical potential to increase capacity and skills of human resources	the level of knowledge and skills of personnel working in the fields related to environment will increase	MEdu, MENR, MAgr	2017-2020
6.1.2. By 2020 strengthening the actions for increasing the capacity of existing eco-tourism and use of the potential in the country				
6.1.2.1.	Developing of public awareness and promotional materials about biodiversity, and particularly about the national parks of the Republic of Azerbaijan	components of national parks and biodiversity will be promoted, promotional information will be disseminated	MENR, MNS, MEdu	2017-2020
6.1.2.2.	Expanding the database on tourism potential of specially protected areas.	database on different ecotourism opportunities aiming at the development of tourism of the republic	MENR, MNS,	2017-2019

## Lesson Plan

Assess the effectiveness of conservation education workshops on Azerbaijani students' knowledge about rare vegetation distribution and skills on monitoring of threats to rare vegetation within the "buffer zones" in Gobustan National Park

Lesson Plan

## Lesson Plan

**Course name:** Assess the effectiveness of conservation education workshops on Azerbaijani students' knowledge about rare vegetation distribution and skills on monitoring of threats to rare vegetation within the "buffer zones"

Select Level >>

Beginner

Intermediate

Advanced

### Lesson Objectives:

Exam implementation (2-3 days)

The first day will focus on Students' knowledge about and attitudes towards rare vegetation and its threats in Azerbaijan based on the "Rare Vegetation Knowledge Test". The last two days will focus on Students' skills on rare vegetation identification in areas clearly marked by examiners based on the "Special Topic Questionnaire" and "Remote Sensing Exercises".

### Lesson Structure:

Rare Vegetation Knowledge Test		
Session Contents	Description	Lesson /Exam Type
Rare Vegetation Knowledge Test	12-15 multiple-choice items with three-four options. These tests assesses biodiversity conservation knowledge and will asked respondents to identify rare plant species.  The threats to Rare vegetation; Rare vegetation monitoring; Buffer zones; Vegetation response to Industrial development	Practical

# Development of exam documentation

## Measurement instrument/ Outcome Indicator

### **Questionnaires**

Respondents list behaviours that they began after the program.

### **Observations**

Observer tests for the presence or absence of a number of behavioural criteria

The student questionnaire which designed to measure the intended outcomes of the conservation education program grouped into four categories:

Category: 1 Environmental Attitudes

Category: 2 Rare Vegetation Knowledge Test (Competency test used in writing to test principles, facts and other knowledge-based objectives)

Category: 3 GIS and Remote Sensing Test / Geographic Information Systems (GIS): Knowledge Base - Remote Sensing Exercises (Demonstrations of skills are particularly useful for evaluating technical skills.

Category: 4 Environmental Behaviours. Measuring Behaviour Changes (1.5 year after the training)

# Development of exam documentation

## Environmental Attitudes

Environmental knowledge, environmental attitudes and environmental behaviors (Tests/Questionnaires)

### Part 1: Environmental Attitudes

This part of the survey is designed to determine environmental attitudes. There are no right or wrong answers, only differences of opinion. CIRCLE the letter that reflects your true feelings.

Participant responses were rated according to the following scale:

- A = Strongly Agree
- B = Agree
- C = Neutral
- D = Disagree
- E = Strongly Disagree

1	If a rare plant is of no use to humans, then we do not need to waste our time trying to protect it.				
	A	B	C	D	E
	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
2	If I had to choose between protecting rare vegetation and creating homes for humans, I would choose to protect the plants.				
	A	B	C	D	E
	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
3	Industries should have to pay for any pollution they cause				
	A	B	C	D	E
	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
4	There is no point in getting involved in environmental issues (including protecting rare vegetation), since governments and industries have all the power and can do whatever they want to.				
	A	B	C	D	E
	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
5	I am interested in spending time working to help the environment, even though I realize this will cut into my free time.				
	A	B	C	D	E
	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree

# Development of exam documentation

## Part 2: Environmental Behaviors

This section of the survey is designed to find out what things you do about the environment. There are no right or wrong answers, so don't worry if you have never done any these things, and don't worry if all your tick marks end up in the 'N' column. We ask only that you be truthful as you answer these questions.

Mark the answer that is closest to the right answer for you:

N - stands for never or no

R - stands for rarely (three or four times a year)

S - stands for sometimes (three or four times a month)

U - stands for usually, or yes (most of the time you have the chance)

	N	R	S	U
I read literature on flora and fauna in Azerbaijan, which is endangered by industrial waste, only in my spare time and for fun				
I talk with friends and colleagues about helping rare vegetation in Gobustan				
I am a member of an environmental club or group				
I appeal to responsible persons and politicians with questions about protection of rare types of vegetation in our country				
I'm involved in projects to improve the environment				

Questionnaire No.	Total	Yes	No	Difficult to answer
<b>A. Implementation at my workplace practices resulting from the course</b>				
<b>B. I am continuing work on the three problems that were presented during the previous course</b>				
- Definition of rare vegetation types in Gobustan				
- Identification of threats of rare types of vegetation in situ using GIS and Remote Sensing technologies				
- Public relations with stakeholders on conservation of rare vegetation types				
<b>C. I am involved in the work on projects that contribute to improving the environmental situation in our country</b>				
<b>Overall</b>				

# Development of exam documentation

**Competency tests** used in writing to test principles, facts and other knowledge-based objectives

## Rare Vegetation Knowledge Test

**Demonstrations of skills** are particularly useful for evaluating physical (technical) skills. It is a type of observation conducted in a controlled environment, as similar to the real work situation as possible.

## GIS and Remote Sensing Test

# Development of Exam Exercises

## Rare Vegetation Knowledge Test

Rare Vegetation Knowledge Test		
Session Contents	Description	Lesson /Exam Type
Rare Vegetation Knowledge Test	<p>10-12 multiple-choice items with three-four options. These tests assesses biodiversity conservation knowledge and will asked respondents to identify rare plant species.</p> <p>The threats to Rare vegetation; Rare vegetation monitoring; Buffer zones; Vegetation response to Industrial development</p>	Practical

### ASSESSMENT

Rare Vegetation Knowledge Test

Pre/Post Test Answer

*This multi-alternative test consists of 10 multiple-choice questions about the distribution of rare vegetation types common in the Gobustan National Park. Each question has four answers. Please select the answer that you think is correct.*

**Q1** *In your opinion, which of the following definitions of the region is correct?*

- South-Eastern part of the Republic of Azerbaijan
- South-Western part of the Republic of Azerbaijan
- Southern part of the Republic of Azerbaijan
- Eastern part of the Republic of Azerbaijan

**Q2** *In your opinion, what type of habitat for rare species of vegetation is presented for monitoring?*

- Desert
- Shrubland
- Desert/Semi-desert
- Grassland

**Q3** *In your opinion, which of the rare types of vegetation communities to monitor?*

- Tamarix
- Suaeda dendroides/Salsola dendroides
- Salsola Nodulosa/Artemisia Lerchiana
- Alhagi pseudoalhagi

Environmental knowledge, environmental attitudes and environmental behaviors (Tests/ Questionnaires)

# Development of Exam Exercises

## Geographic Information Systems (GIS): Knowledge Base - Remote Sensing Exercises

### Geographical Data Base design and creation of Specialized GIS Environment

#### Raster Georeferencing

Establish control points

Input the known geographic coordinates of these control points

Choose the coordinate system and other projection parameters:

Projected Coordinate System: WGS\_1984\_UTM\_Zone\_39N

Projection: Transverse\_Mercator

#### Field Study and Data Recording

Buttons & Pages in your GPS

Getting to know the basic GPS terms

Set Up

Entering a grid reference

#### Rare Vegetation Classification

Creating training and test signatures from imagery

Maximum likelihood classification

Classification accuracy assessment

#### Change detection

Comparison of NDVI values within "buffers zones"

Comparison of NDVI values on North-West-East-South parts of the Study area as a single whole

## GIS\_Remote Sensing – Test

## CONSERVATION CORNER: YELENA GAMBAROVA ON RARE PLANT CONSERVATION IN AZERBAIJAN

### CONSERVATION CORNER: YELENA GAMBAROVA ON RARE PLANT CONSERVATION IN AZERBAIJAN

📅 JULY 23, 2018

Rare plant conservation might not be the sexiest topic in today's headlines, but it's a crucial part of wildlife conservation. Sophie Breitsameter speaks to researcher and scientist Yelena Gambarova about what exactly vegetation conservation involves, the current threats to rare plants in Azerbaijan and how Azerbaijan's nine climate zones affect her work

Yelena Gambarova has been working on rare plant conservation in Azerbaijan for 10 years. In her role as Researcher, Geographic Information Systems and Remote Sensing Specialist at **R.I.S.K. Scientific Production Company**, the race is on to identify and describe potential threats to rare vegetation communities in the country and combat potential extinction in the face of various threats. We speak with Yelena to find out more about her work and the projects that she is currently involved in.

## Conservation Education Program evaluated in Azerbaijan

**6 June 2018** – Students from the State National University will take a survey on their environmental knowledge, attitudes, skills and self-reported behaviors to evaluate the outcomes of a project that was launched in 2016 to increase capacity for biodiversity conservation in the Gobustan State National Park. The programme, developed by scientists from the Azerbaijan Institute of Botany and the National Academy of Sciences aims to develop the students' knowledge about the distribution of rare vegetation, skills on monitoring threats to rare vegetation, environmental effects and responsible environmental behaviors. [Read more...](#)

Desertification

## Conservation education program in Azerbaijan demonstrates successful outcomes

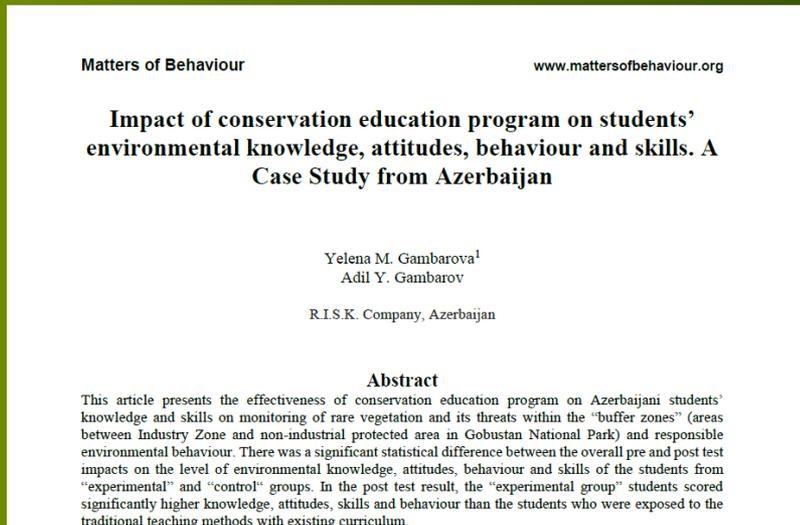

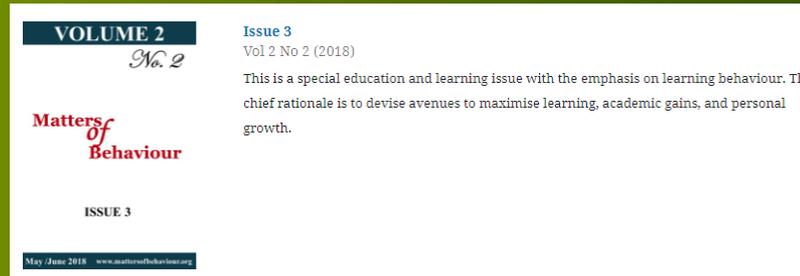

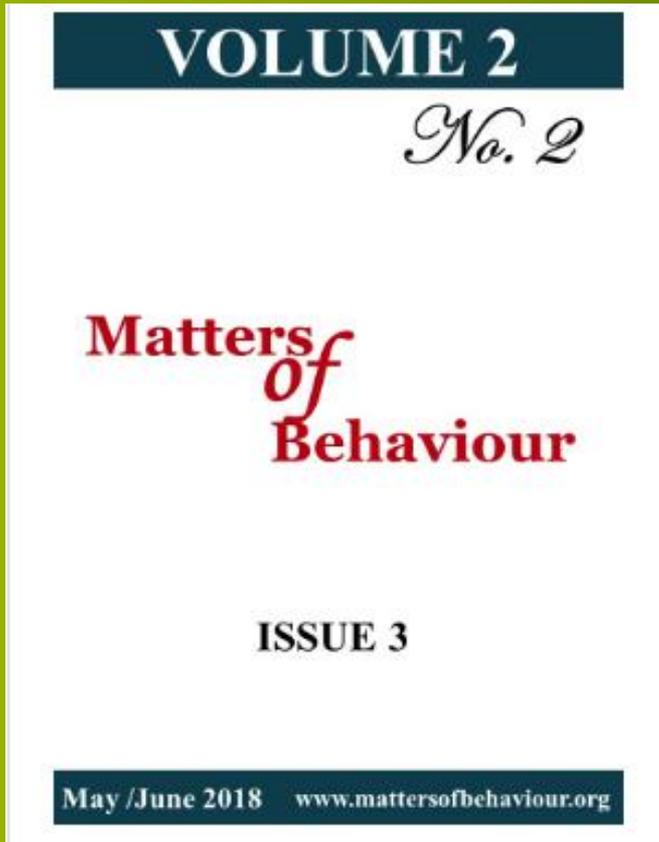

**26 October 2018** – A written evaluation has confirmed the effectiveness of the conservation education programme on rare vegetation conservation in Gobustan National Park, demonstrating that the program participants have significantly increased their knowledge and skills on rare vegetation identification, and their attitudes have become significantly more pro-environmental. The programme, which targeted the students of the State National University, has been launched in 2016 by scientists from the Azerbaijan Institute of Botany and the National Academy of Sciences to develop the students' knowledge about the distribution of rare vegetation, build their skills on monitoring threats to rare vegetation, and educate them on environmental effects and responsible environmental behaviors. ### Action Plan

#### Level 4: Organizational Level Performance

##### Action Plan

###### Overall Intervention Strategy

###### 1. Statement of overall strategy

Continue work on protection of rare vegetation types in Azerbaijan, which can have a profound, long-term impact on the future in the country.

###### Постановка общей стратегии

Продолжить работу над стратегией защиты редких типов растительности в Азербайджане, которая может оказать глубокое, долгосрочное воздействие на будущее в стране.

###### Перечень ресурсов, необходимых для осуществления стратегии

- A. Лица, которые хотят изучать новые методы работы
- B. Лица, участвующие в заседаниях по разрешению проблем
- C. Источники финансирования (спонсоры); лица, разрабатывающие учебные программы; люди, которые хотят принять участие в учебной программе

###### Перечисление некоторых первоначальных задач, которые необходимо предпринять, если стратегия будет успешно реализована

- A. Объяснение методов работы; вовлечение людей в сеансы мозгового штурма (решение проблем); спрашивайте людей о том, что им нравится / не нравится в своей работе.
- B. Обучение ключевых заинтересованных сторон повышению их способности решать три проблемы; предложить им альтернативы для рассмотрения; облегчить их использование методов решения проблем.
- C. Отправить предложение в различные ответственные организации с просьбой об их заинтересованности в проведении предлагаемого плана действий; собирать ответы и анализировать их; направлять резюме отчетов министерствам экологии и государственным предприятиям с просьбой о финансовой / планирующей помощи;
