

### Project Update: August 2019

Currently, I am in the 10th month of my fieldwork. Also, I am working on laboratory to identify tree species eaten by frugivores in Complex Torotorofotsy-lhofa forest. We observed 20 tree species until now (with tree observation and camera traps) and we observed nine lemur and seven bird species eating fruits. Please, find in attach some photos of lemurs and birds, observed eaten fruits that I took during the fieldwork.

*Lepilemur mustelinus*

Left: *Hypsipetes madagascariensis*. Right: *Microcebus lehilahytsara*.
