

## **Project Update: December 2019**

Dr Diego Paez-Rosas, a project collaborator and my lab work supervisor, will be travelling to California UC Davis in December to complete the final analysis on the shark biopsy samples. Hopefully, we'll have final results on these analyses by the end of this year or beginning of Jan.

I am sending an activity report for the Galapagos National Park that includes preliminary project results and conservation recommendations from this project to improve the management of the Galapagos Islands.

This technical report has already been sent to the Galapagos National Park Directorate.
