

### **Project Update: November 2020**

1. My project was delayed for months due to Covid19 pandemic.
2. At the end of October 2020, I already started data collection. I have assessed 12 forest patches in the region. Awi Zone.
3. So far, I have found four primate species in the region with different encounter rates.
4. In addition, I recorded the extent of threats of each forest patches as well as abundant of each primate species in the region.

Black and white colobus monkeys of the region

Some views of the forest of the area
