

Project Update: September 2022

As part of the grant, we have conducted a few awareness programmes in association with Tuticorin Kamaraj College, schools, and one village near Rameswaram. In addition, I have given a few invited talks on coral reefs at Saveetha Engineering college and Annamalai University. Please find the photos attached.

We are planning for one more final visit by this month's end to monitor our deployment tiles to see coral recruits and submit the reports.
