SHARK ROUTE

Learning about sharks and ours oceans

The Shark Route is Misión Tiburón's first project and it is an innovative initiative that seeks to educate elementary students about the importance of marine resources, especially sharks. The aim of this project is that students have a new vision about sharks, and their role in the aquatic ecosystem. Also, we would like to clarify that sharks are not man eaters' creatures; they are in fact vulnerable species that accomplish a vital role in the trophic chain of the oceans. At the end of each event, the students will see sharks as charismatic animals that actually help the humanity to have a healthy marine ecosystem.

OBJECTIVES:

- To raise awareness in coastal communities regarding the ecological importance of sharks in our oceans, as well as their principal threats.
- To promote respect and responsibility for marine life, especially on sharks.

METHODOLOGY

As the first step, between August and October 2009, the team of Misión Tiburón (MT) coordinated the design and elaboration of informative posters, t-shirts, educational games and Yiyo, the Mascot of Shark Route. Once finished these tasks, the team organized the events in each coastal community.

Between November 2009 and August 2010, different Shark Route events were held in distinct communities along Costa Rica's Pacific Coast. For the event, posters with basic information about the evolutional, biological and ecological aspects related to sharks were set up in each community. In addition, the team carried out with the children educational games about the trophic chain of the oceans and the sharks' biological aspects learned. After the games, Yiyo (the Shark Route mascot) a funny hammerhead shark had shared with the children and they had fun together.

After the Yiyo presentation, refreshments were also served to the children, professors, school staff, and other community stakeholders who helped with the day's events. At the end of the events, the MT team presented a short documental about sharks, that resumes all the aspects learned during the day.

RESULTS

The Shark Route visited 11 primary schools of the Pacific Coast of Costa Rica (please see Table 1, Figure 1 and Annex I-XXXV). The events were held among the Pacific Coast, in the most important fishery communities. During the activities we raise awareness to approximately 535 students, and their families.

Table 1. Schools visited by the Shark Route, Costa Rica 2009-2010.

Date	School	Region	Number of students
25/11/2009	Escuela de Playa Blanca	Puntarenas	21
