

Project Update: May 2022

The second and final phase of the project looked at tree planting (pollinator gardens) and establishment of bee keeping project. This project won the World Economic Forum/Uplink Top Innovator Award. <https://uplink.weforum.org/uplink/s/uplink-contribution/a012o00001pTQXyAAO/pollinator-gardens>

Tree planting/pollinator gardens

Trees were planted in schools with school children being trained in tree planting. Some of the trees were taken to Chivhere rural community where they were distributed to farmers for planting in their fields and home surroundings. Tree species were provided from our tree nursery which included indigenous trees only.

Indigenous tree nursery

Tree planting at a local school

Tree planting preparation at a school

Tree planting at Chinhoyi University of Technology

Distribution of trees to farmers

Bee keeping

Farmers were trained in bee keeping practices and they were given bee keeping equipment after the training so they can start a bee keeping project.

Bee keeping training and allocation of bee keeping equipment.
