

Human-Snake Conflicts Mitigation Presentations in Snakebite Management Training in Nepal:

Besides our particularly designed project funded by The Rufford Foundation, which we organised and successfully conducted in various parts of Nepal, the Government of Nepal's health/education related institutions also invited our team (Dr. Chhabil Thapa and Mr. Kamal Devkota) in the Snakebite Management Training in different parts of Nepal. These programmes were specifically targeted to government medical professionals working on various snakebite treatment centres or healthcare centres. Some of the policy makers from government sides were also present in these programmes. We not only presented our work and shared about our ongoing programmes but also raised and discussed on some points to minimise the human-snake conflicts and to improve snakebite management in treatment centres of Nepal. We have distributed our promotional materials like brochures and posters to them. We also showed our educational videos in these training courses and got good feedback too for upcoming works. The lists of various programs organised by government institutions in different districts of Nepal where we were invited and have presented about our ongoing programmes are as follows:

1. Organised by Health Training Centre, Pokhara, Kaski and supported by FAIR MED Nepal at Hariyo Kharka, Kaski, Nepal. September 24, 2022.
