

## Project Update: January 2022

We started to conduct the wildlife consumer surveys using by local people-based approaches in Taninthari Region in February 2021. We started our surveys again in August 2021 after suspending for a few months due to the unexpected issues in the country. A total of 332 local people, 100 from Dawei District and 100 from Myeik District and 132 from Kawthaung District were interviewed for wildlife consumption using a standard questionnaire set by local people-based approaches. Based on a multi-stage random sampling to perform door to door interview we managed strictly according to a selecting order of city-district-community neighbourhood.
