

## Project Update : August 2021

On August 26th 2021, I carried out a forest prospecting mission in the Biosphere Reserve of Yangambi. I am sending you some pictures( enclosed) to update the profile of my web page on the site of the Rufford Foundation.

The project has been delayed because I had some health problems but I'm going back to the forest on September 12th 2021 for a long period of field work.
