

Project Update: November 2022

Promulgation of the main results of the research activities

The main results of research during the implementation of our project were presented at conferences and two theses were published (theses are attached as separate files).

During the expeditions, valuable floristic potential territories were investigated for the expansion of the park boundaries in order to preserve populations of rare species of different levels of protection. The results of the work were presented at the II international scientific and practical Internet conference "Modern challenges and current problems of forestry education, science and production" (April 15, 2022).

https://www.researchgate.net/publication/365611063_PROSPECTS_OF_EXPANDING_THE_TERRITORY_OF_SEYMSKIY_REGIONAL_LANDSCAPE_PARK

Information about the findings of new localities of populations of rare species and their dependence on different types of biotopes on the territory of Seymskiy Regional Landscape Park were summarised. The results were highlighted at the 1st all-Ukrainian scientific and practical internet conference "Current state, problems and prospects of the development of natural and mathematical sciences and their teaching methods" (October 20-21, 2022).

Publication of posts in the social media

We created a cartoon about the object of our project – rare plants. This cartoon was shared through Facebook and has received more than 1000 views.

https://www.facebook.com/permalink.php?story_fbid=2400958650041738&id=10003828793629

The purpose of creating this cartoon is to explain in an accessible form the meaning and value of rare plants, to teach to recognise such plants in nature and to teach the rules of behaviour with them.

We began to publish guidelines for the identification of rare plants of Seymskiy Regional Landscape Park, comparing them with other species of the same genus:

Events for the local schoolchildren and university students

Action «Rare ephemeroids of Seymskiy RLP» (April 2022)

Due to the martial law in our country, we had to hold this event online. Schoolchildren who studied the topic of preserving rare ephemeroids of Seymskiy RLP and submitted their works to the competition were involved in the campaign. The winners received awards. This event made it possible to involve four schools in our region and popularise nature conservation knowledge.

We cooperate with NGO "Vorhol". Together we organized the Ecological Camp "Vorhol", which took place on the territory of Seymskiy RLP. Olena Miskova conducted classes within the framework of the project, the goals of which was raising of public awareness concerning the value of the park's rare plants via educational activities. The local population of different age groups was involved in this event. The summary video about our camp has received more than 2300 views.
